# STUNNING ARCHITECTURAL GLAZING... ENDLESS POSSIBILITIES

Horizon Architectural Glazing is your perfect partner for commercial and domestic projects.

We provide ideas, expert advice and a full support service to homeowners, developers, architects and project managers across the whole of the South West.

We offer a growing choice of aesthetically pleasing and superbly produced bifold doors, elegant windows, floor-to-ceiling windows, glass doors, screens, partitioning and balustrades.

We also offer a complete range of aluminium products which enhance even the very finest of homes, and with aluminium you get to choose from a huge variety of colours.

We work particularly closely with Rationale who offer a beautiful range of Scandinavian designed windows and doors also Residence whose collection is designed to authentically replicate 19th-century timber also using modern high-performance and virtually maintenance free materials.

## PRODUCT RANGE

### Architectural Glass

A full range of stunning products including glass doors, walls, screens, partitioning and balustrades.

### Curtain Walling

Using glass to create floor to ceiling windows with up to 360 degree views.

### Aluminium

Whether you are installing bespoke windows and doors, bifold doors or external sliding doors using aluminium can enhance even the very finest of homes.

### Residence Collection

A window and door system designed to authentically replicate 19th-century timber designs fusing classic aesthetics with a twist of modern materials.

### Rationale

A wide range of beautiful Scandinavian windows and doors that can be individually designed, available in both timber and timber clad with aluminium.

# ARCHITECTURAL GLASS

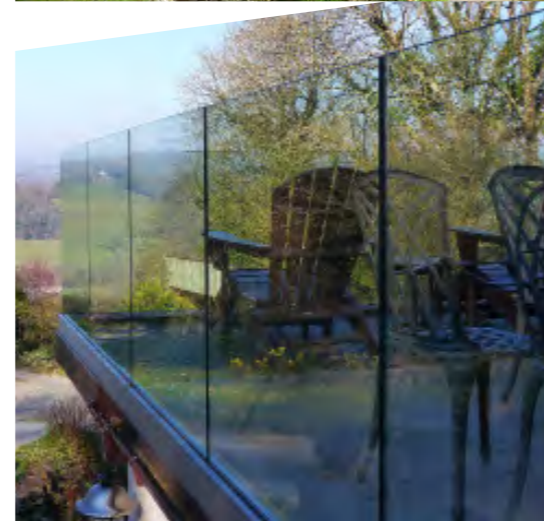

## Glass Doors, Walls & Screens

Glass doors, walls and screens are increasingly popular as cost-effective and stunning solutions which separate work areas, whilst allowing light to flood in and interaction to occur. For instance, glass creates a more open inviting space for people, no longer hidden behind solid walls and closed doors. Glass wall partitioning provides a striking look with the same sound insulation properties of a solid partition wall.

## Glass Balustrades

Our frameless glass balustrade systems are suitable for both residential and commercial projects. As well as looking elegant - they are lightweight, extremely strong and can be used in an array of indoor & outdoor installations.

Pro-railing is a stylish durable cost-effective stainless steel handrail and component system designed with ease of installation in mind and ensures your glass balustrade looks superb.

## Glass in architecture

The use of glass in architecture has come a long way from the time when individual glass blocks were used in small window applications - intended to keep the weather out, allow some light in and to provide a view to the outside.

Today, architectural glass is used to control heat-gain/heat-loss, provide thermal comfort, allow natural daylighting of buildings, for safety & protection along with the opportunity to create a variety of impressive styles and effects.

# CURTAIN WALLING

## Curtain Walls, Roofs, Sculptural Facades

Glass is now used for more than just windows it is also used to create a variety of stunning effects from curtain walls, roofs and façades to interior elements such as staircases and floors. This versatile building material blurs the boundaries between interior and exterior space whilst also providing options such as switchable privacy glass.

In the modern workplace the use of glass allows for 360-degree views, as well as floor-to-ceiling windows, which ensure that the maximum amount of daylight can enter the building - something which has been proven to be highly important for both productivity and creativity.

## Aluminium

Whether you are installing bespoke windows, doors, bifold doors and external sliding doors using aluminium will bring a touch of class to any project.

There are numerous elegantly designed aluminium frames to choose from that will be perfect for your home, workplace or school project - available in hundreds of RAL colours to suit any aesthetic.

Multiple bifold patio doors can seamlessly link your home to the garden. Integrating slim frame aluminium windows into your roof will flood your home with light. Modern patio doors combine stunning aesthetics with outstanding performance, offering floor-to-ceiling and wall-to-wall glass.

If thermal efficiency is your highest priority, Horizon can provide windows and doors with industry-leading thermal insulation that meets the requirements for Passive House Standards.

## RESIDENCE COLLECTION

The Residence Collection comprises window and door systems designed to authentically replicate 19th-century timber designs, fusing classic aesthetics with a twist of modern materials.

The traditional elegant flush exterior and stylish decorative interior create that classic aesthetic whilst modern high-performance materials mean they are virtually maintenance free - so require no painting or staining.

A combination of design, innovation and technological advancement is how Residence outperforms many other systems, with its highly efficient market leading thermal and acoustic performance it is perfect for all types of architectural glazing projects.

As well as offering a stunning range of windows, the Residence collection can be incorporated into fabulous French, Residential and Composite doors as well as Orangeries and Garden Rooms.

Traditional aesthetics, modern function, perfect solutions

## RATIONEL

We work with Rationel simply because they offer a wide range of windows and doors with beautiful Scandinavian designs that can be individually designed and are available in both timber and timber clad with aluminium.

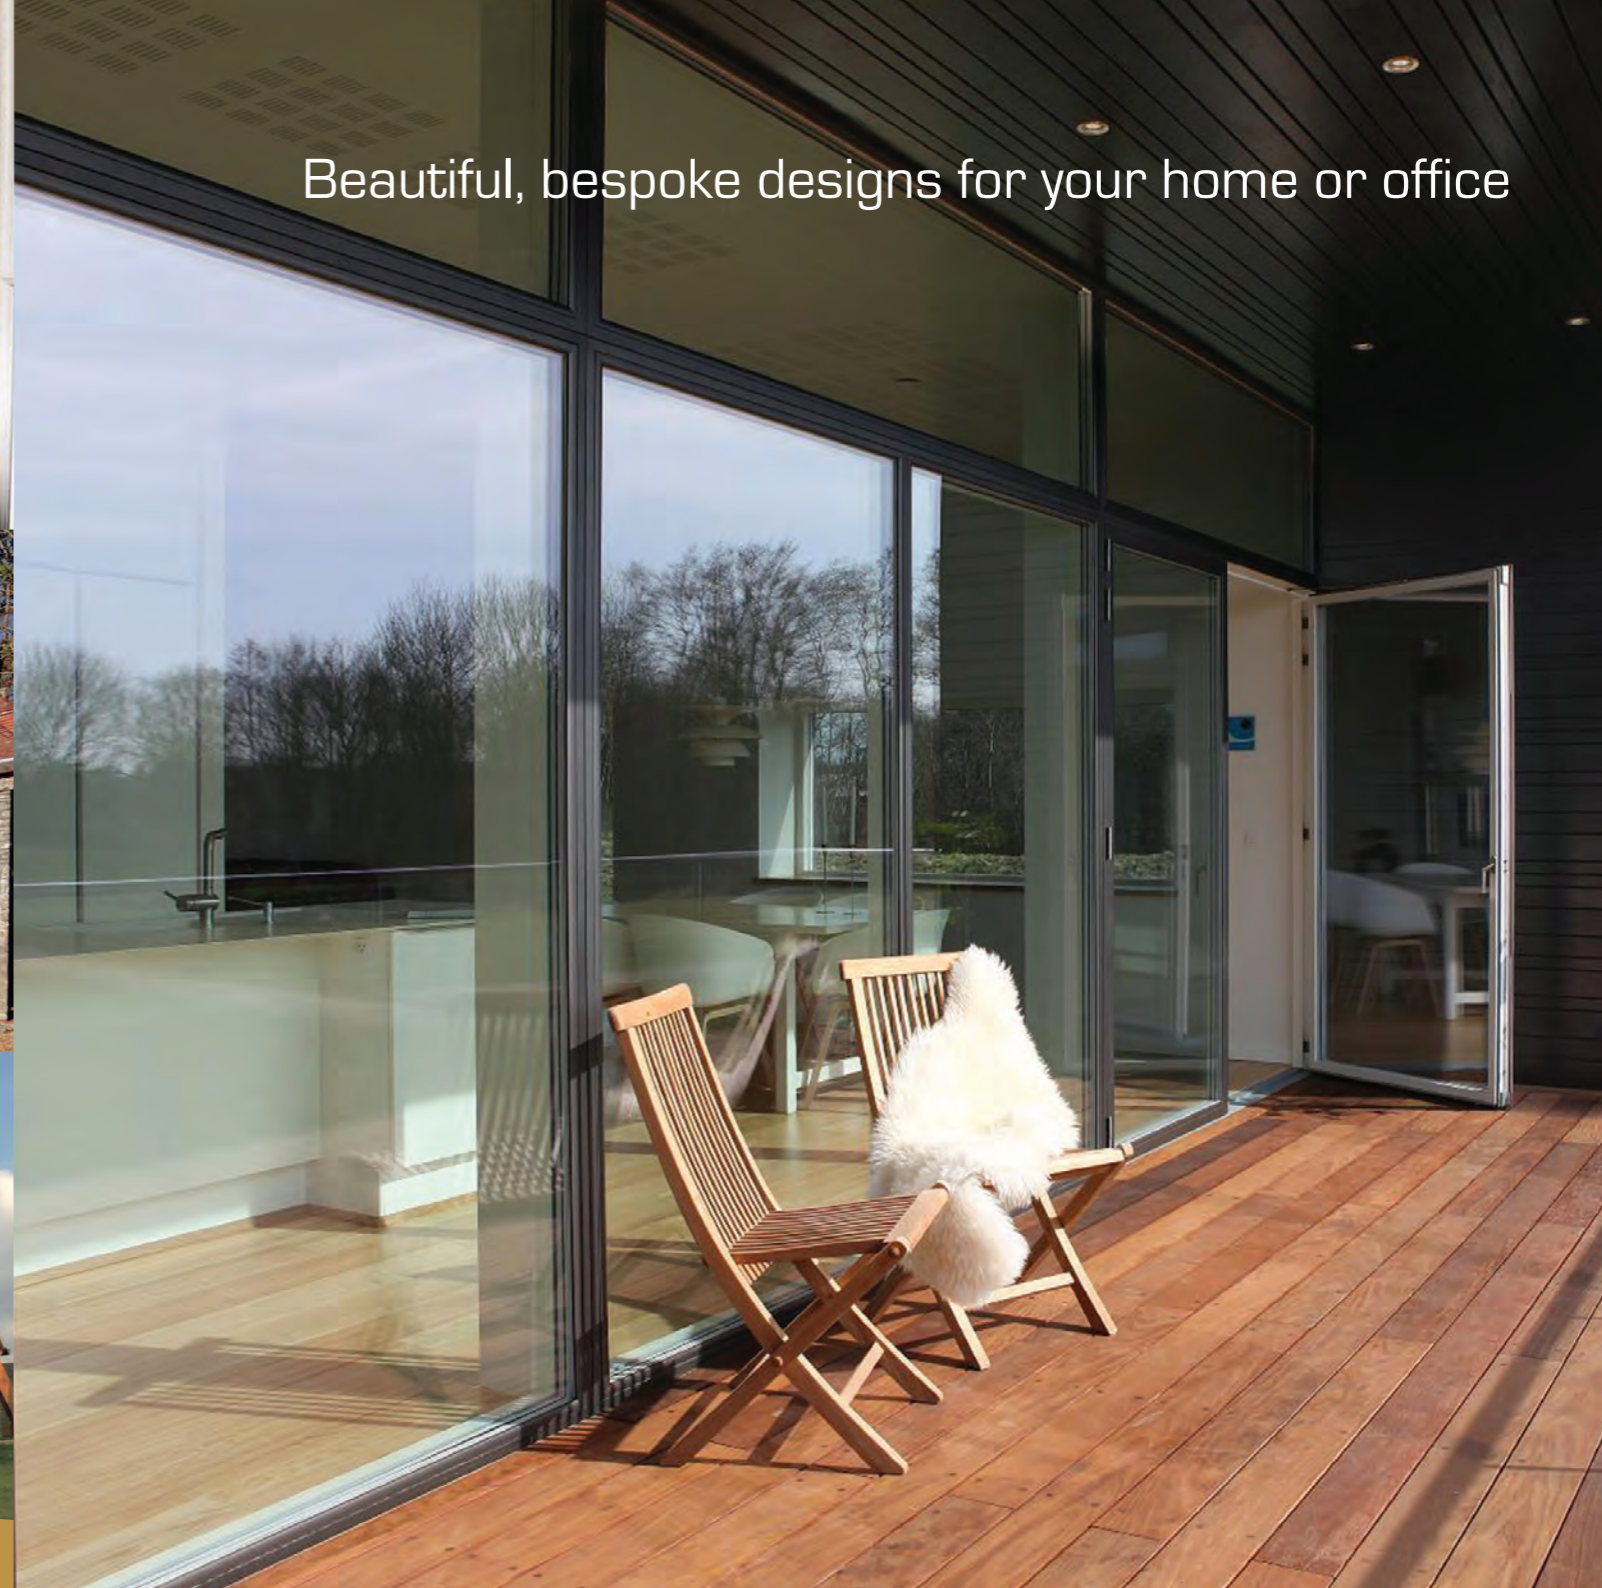

Whether you are wanting a natural look from a sustainable source, or a low-maintenance option that is purpose-built to protect your home against the elements - not to mention the wear and tear that comes with frantic family life - Rationel offers you the choice and quality that your project is seeking.

Rationel also manufacture and supply bespoke shaped units which are capable of fitting a broad range of unique openings, including curved, circular and slanting spaces.

No matter how complex your stylistic ambition, Rationel windows and doors can make it a reality for your home, school or workplace.

Beautiful, bespoke designs for your home or office
